### DETAILED ACTION

#### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1 and 4-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1 and 4, applicant should clarify what is intended by "setting the directions of orientation magnetization of each said magnet piece relative to the adjacent joining face, at an acute angle (or less than 90°)."

#### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-3, as best able to be understood in view of the rejections under 35 U.S.C. 112, second paragraph, are rejected under 35 U.S.C. 103(a) as being unpatentable over Kan et al. (figure 8a)[US 4,557,582] in view of Kan et al. (figures 7a-7b) and Japan 2-222110.

Art Unit: 2832

Kan et al. discloses a magnet roller [figure 8a] comprising:

- a shaft [9]; and
- a plurality of magnet pieces [31-34] mounted at the periphery of the shaft arranged such that the directions of the orientation magnetization of adjacent magnet pieces facing joining faces thereof coincide with roller radial directions and the magnetization converging towards the outside of the joining face.

Kan et al. (figure 8a) disclose the instant claimed invention except for: the specific arrangement of the faces of the joints between the adjacent magnets.

Kan et al. (figures 7a-b) discloses the pole pieces having differing sizes changing the magnetization of the roller [figure 7a-b].

Japan 2-222110 discloses a plurality of adjacent pole faces offset from each other.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use the offset design with differing sized pole pieces, as suggested by Kan et al. (figures 7a-b) and Japan 2-222110, with the magnetization pattern of Kan et al. (figure 8a), for the purpose of controlling the magnetization density.

#### *Response to Arguments*

5. Applicant's arguments filed 04-23-03 have been fully considered but they are not persuasive.

Applicant argues that Kan discloses parallel orientation magnetization directions of respective magnet pieces, set at substantially 45° to the joining faces with no convergence. Examiner disagrees. Applicant has not clearly set forth the reference points from which the angles are determined. As best

Art Unit: 2832

understood, Kan discloses convergence toward "an outside apex" of a joining face at angles less than 90°.

*Conclusion*

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
